## **Technical Notes on Concepts and Methods**

### **1. Reference Point/Period**

- Population : Population data is given for the middle of the calendar year.
- Enrolment : Student data is given on the last school day of October of a given academic year.
- Teachers : Teacher data is given on the last school day of October of a given academic year.
- Expenditure: Financial data is given for the financial year from April to March of the following year.
- Gross Domestic Product (GDP): GDP data is given for the calendar year.

### **2. School Capacity**

- Physical capacity of a school is estimated at the rate of 35 pupil/students per classroom.
- In case of double shift schools, capacity is measured in terms of 70 pupils/students per classroom.
- If enrolment of a school is more than its capacity then it is a case of over utilization of physical capacity.
- If enrolment of a school is less than its capacity then it is a case of under-utilization of physical capacity.

### **3. School Size**

- The size of a school is measured in terms of number of pupils/students enrolled on the last school day of October of a given year.
- Average size of a school is computed by dividing total enrolment by number of schools in a given area

### **4. Teacher Utilization**

- Child/Teacher ratio is the number of children per teacher in a Pre-school centre.
- Pupil/Teacher ratio is the number of pupils per teacher in a Primary school.
- Student/Teacher ratio is the number of students per teacher in a Secondary school.
- The above ratios are calculated by dividing total enrolment by the total number of teachers in the school/centre.
- The Principal of a school is not included while counting its teaching staff.

### **5. Trained Teachers**

- A trained teacher is one who has successfully completed a recognised course in teacher education methods and teaching techniques.

## **6. Graduate Teachers**

- A graduate teacher is a teacher with at least a recognised bachelor's degree.

## **7. Gross Enrolment Rate (GER)**

- The GER gives information on the extent of participation of a specific school-going age group population in a specific level of education.
- GER at primary level is calculated by relating population in age group 5 – 11 to the enrolment in primary schools.
- GER at secondary level is calculated by relating population in age group 12 – 16 to the enrolment in secondary schools.

## **8. Female Participation Rate**

- The percentage share of females in the total enrolment is computed to find out the disparity in gender participation in a given level of education.

## **9. Transition Rate**

- It is calculated by relating the number of graduates who join the next level of education in a given year to those who graduated from the lower level in the previous year.
- Transition from primary to secondary level is calculated by relating the number of students who passed the CEE in a given academic year to the intake in Form 1 in the secondary schools during the next academic year.

## **10. Flow Rate**

- It is calculated by following a cohort of students who join a given class in a given year and move to the next class in the subsequent year.
- When using flow model technique for projection of enrolment, flow rates are used for carrying forward students from one class in a given year to the next class in the subsequent year.

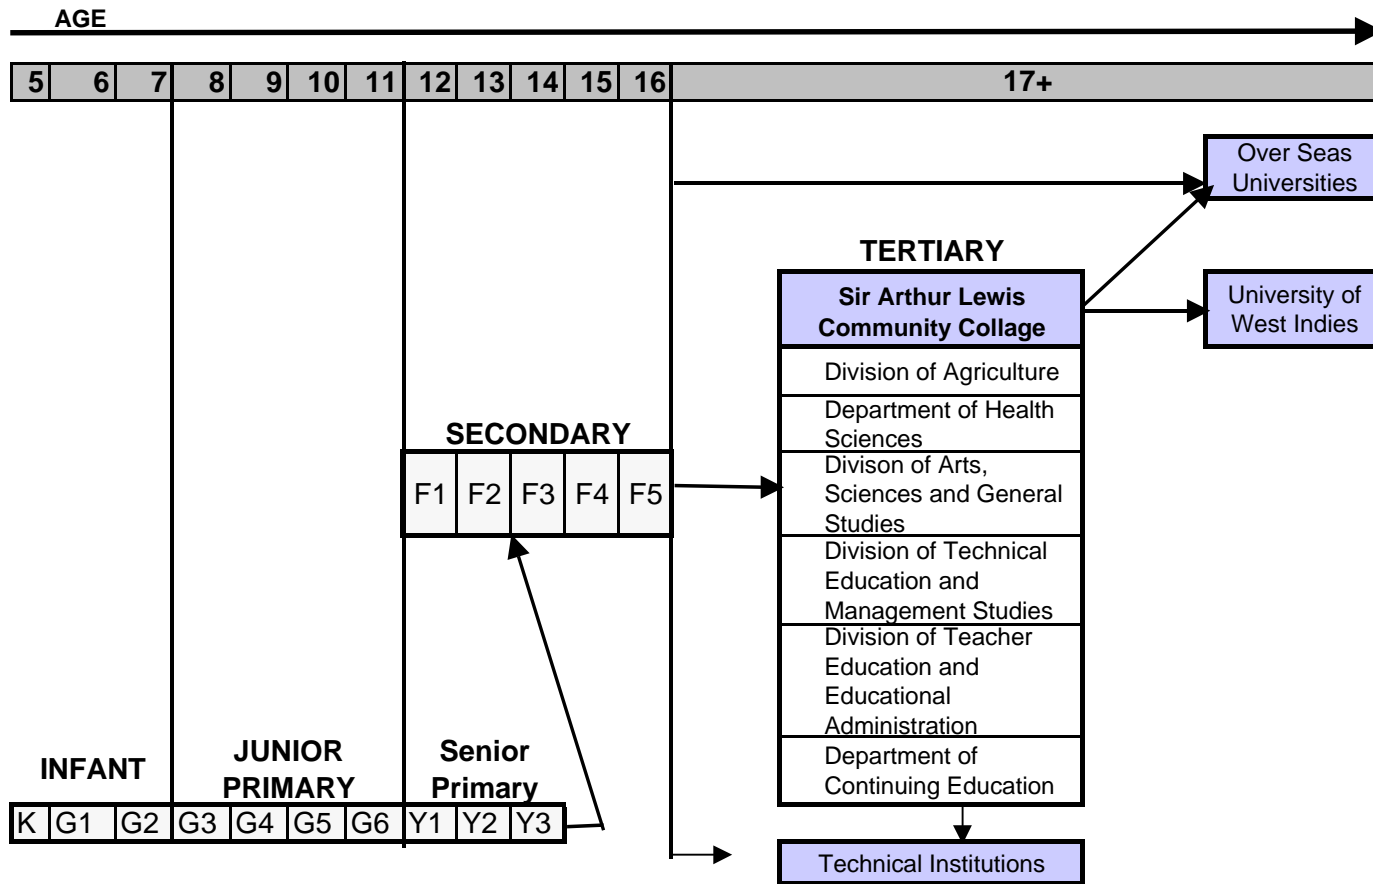

## **11. Dropout Rate**

- It is calculated by relating the number of students who dropped out during a given year to the enrolment in the beginning of the year.

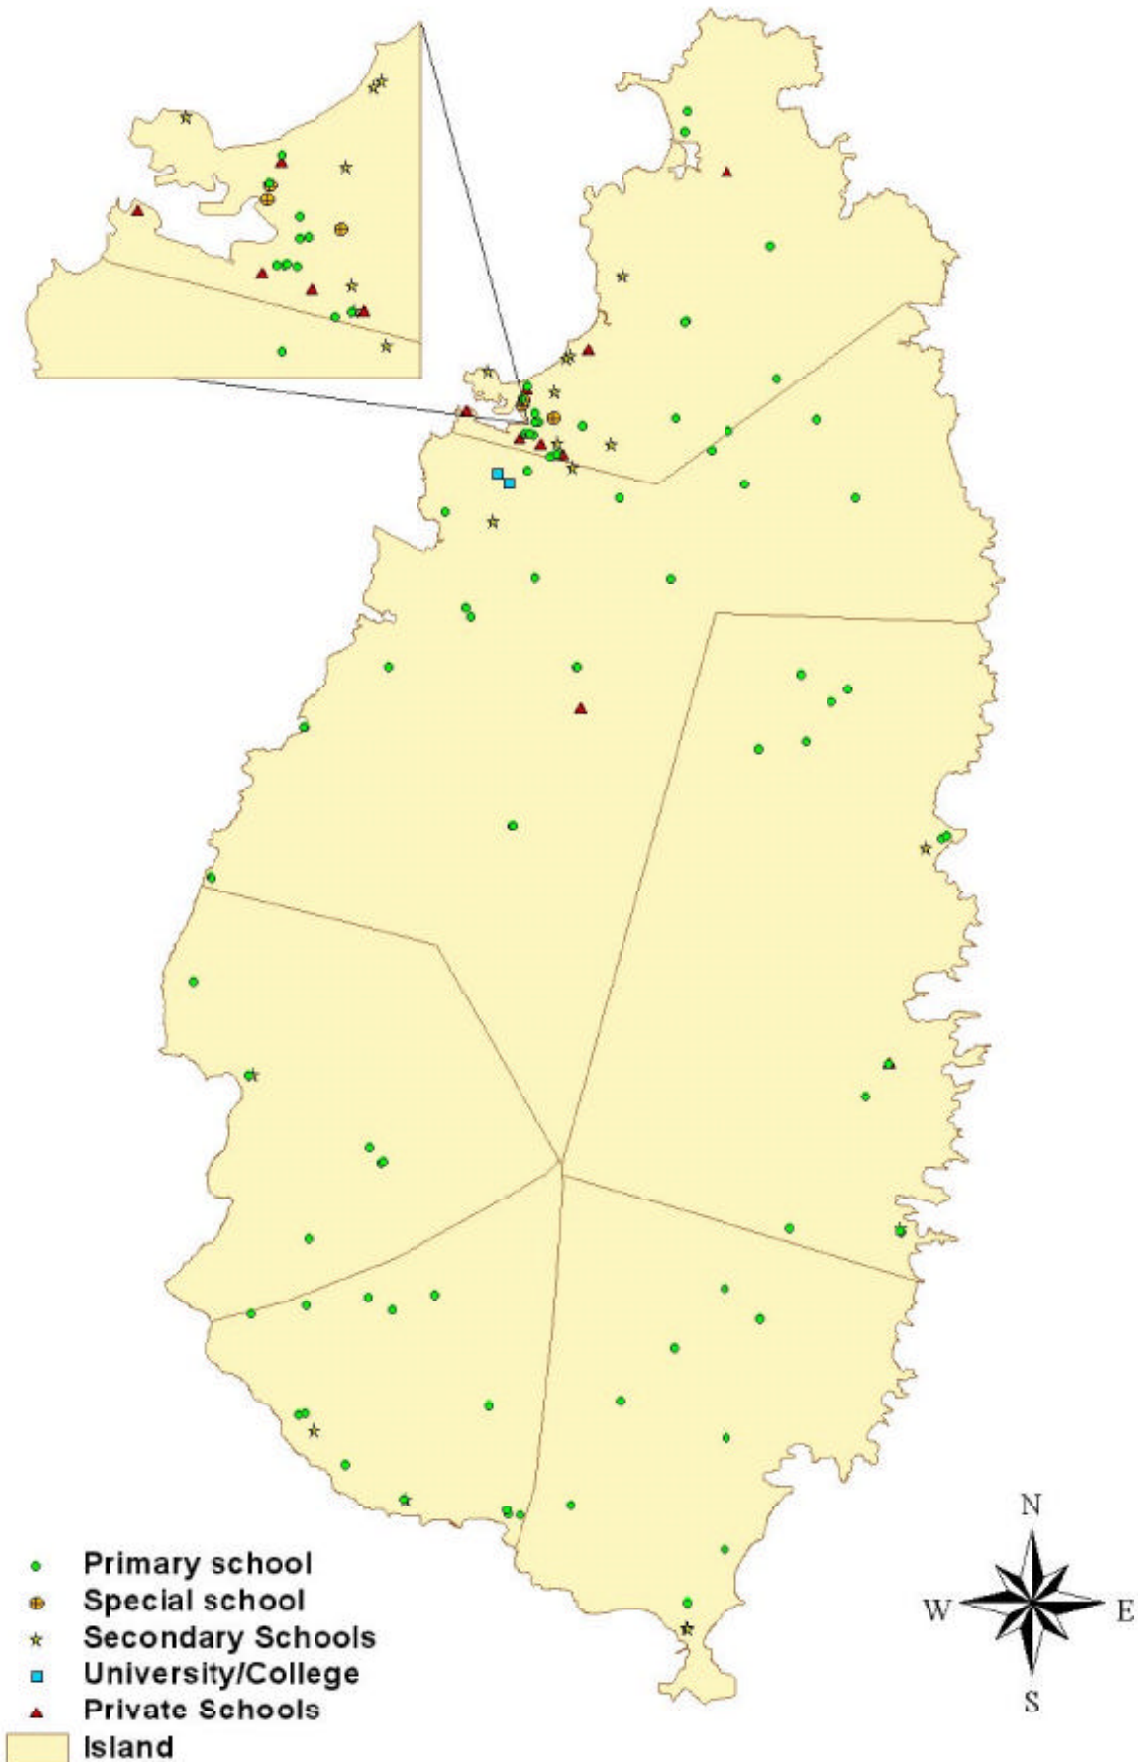

## **12. Expenditure per Pupil/Student**

- Expenditure per pupil/student is calculated by dividing total expenditure allocations to a given level of education by the enrolment at that level.

 Kindergarten enrolment has been projected by assuming it to be equal to the estimated population of 5 year olds is based on population projections prepared by the Government Department of Statistics.  
 Enrolment projections from Grade 1 to Grade 6 have been prepared with the help of the Flow Model Technique and a constant flow rate of 98% has been applied throughout the projection period for all grades.

*Note : Table 70 shows that the transition rate from Grade 7 to Form 1 has increased from 54% to 64% during the years 1994/95 to 1998/99. Because of the Government Policy to achieve 98% transition rate by 2005/06, transition rates for 1999/00 to 2004/05 have been linearly interpolated.*

*Enrolment in Forms 1 to 5 are actuals.*

*Flow Model Technique has been used to project enrolment figures for the remaining years as shown in the Table and a constant flow rate of 98% has been used for all forms.*
