

## FOREWORD

*This is the Eleventh Annual Digest of Vital Statistics published by this Department.*

*The purpose of the publication is to provide Demographers, Planners, Research Workers and the general public with certain base series on Vital Statistics.*

*This publication gives details on Births, Deaths, Marriages and Divorces: future publications will encompass a wider cross-section of Vital Statistics.*

*The Department acknowledges the assistance received from the Ministry of Health (Statistics Unit) and the Registry Department.*

*Notification of errors and omissions as well as suggestions for improvement will be welcomed.*

*It was decided to realign some of the previously used district boundaries to match those used in the 1991 Population and Housing Census. As a result there have been some changes in the district totals.*

*NB. All data for 1994 is provisional.*

**DIRECTOR OF STATISTICS**

**JUNE 1995**

---

## ACKNOWLEDGEMENTS

*The Department would like to recognise the efforts of those staff members who participated in the preparation of this report.*

*The Report was compiled by Ms. Geraldine St. Croix, ably assisted by Mrs. Valentine Quinlan and under the general supervision of the Head of the Demographic Section, Ms. Ethel Jn. Baptiste.*

**DEFINITIONS AND EXPLANATORY NOTES  
ON VITAL STATISTICS, RATES AND TERMS**

**AGE AND SEX COMPOSITION**

**MEDIAN AGE** :- The age at which half the population is older and half is younger.

**AGE DEPENDENCY RATIO**:-is the ratio of persons in the "dependent" ages (under 15 and over 64 years) to those in the "economically productive" ages (15-64 years) in a population.

$$\frac{\text{Population under 15} + \text{Population over 64} \times 100}{\text{Population 15 - 64}}$$

**SEX RATIO** :-The Sex Ratio is the ratio of males to females in a given population, usually expressed as the number of males for every 100 females.

The sex ratio at birth in most countries is about 105 or 106 males per 100 females. After birth, sex ratios vary because of different patterns of mortality and migration for males and females within the population.

**MORTALITY**

**CRUDE DEATH RATE**:-Number of deaths in year  
----- x 1000  
Mid-year Population

This rate tells us how many people die per 1,000 population in a given year.

**INFANT MORTALITY  
RATE**

:-Number of deaths to persons 0 - 1  
----- x 1000  
Number of live-births in year

The Infant Mortality Rate tells us how many infants (under 1) who die in a given year per 1,000 births in that same year.

(x)

### **LIFE TABLE FUNCTIONS**

*nqx* - Represents probabilities that persons will die before reaching the beginning of the next age interval.

*lx* - Represents the number living at the beginning of the age interval.

*ex* - This figure gives us the average remaining life expectancy at any age.

### **FERTILITY**

**CRUDE BIRTH RATE** = 
$$\frac{\text{Number of Live-births in year}}{\text{Mid-year Population}} \times 1000$$

*This rate simply tells us how many live-births take place in a certain year per 1000 population.*

**TOTAL FERTILITY RATE:** *Tells us what the completed family size would be if the fertility rate behaviour of a given year continued unchanged into the future.*

**NET REPRODUCTIVE RATE:** *is the average number of daughters that would be born to a woman if she passed through her life from birth conforming to the age specific fertility rates and mortality rates of a given year.*

### **POPULATION CHANGE**

**RATE OF NATURAL INCREASE:** *is the rate at which a population is increasing (or decreasing) in a given year due to a surplus (or deficit) of births over deaths expressed as a percentage of the base population. This rate does not include the effects of migration.*

$$\frac{\text{Births 1994} - \text{Deaths 1994}}{\text{Mid-year Population 1994}} \times 1000$$

**SOURCE:** *Unless otherwise stated the tables in this publication have been derived from data obtained from the Registrar of Civil Status.*

## ANALYSIS OF VITAL STATISTICS

*The Vital Statistics Report for 1994 highlights Births, Deaths, Marriages and Divorces.*

### **BIRTHS**

*Registered Births numbered 3568 in 1994 an almost equal amount to the 3556 births registered in 1993. The crude birth rate of 25.0 per 1000 population represents a 2.0 % rise over the previous year's rate of 24.5 per 1000.*

*The increase in the absolute number of registered births and crude birth rate do not constitute conclusive evidence of an upward trend in the child-bearing experience of women in the society. A better indicator of change in fertility is the total fertility rate. This rate is a measure of the number of children a woman could expect to have in her lifetime, if at each age she had the same number of children women at those ages had in the year for which the rate was calculated.*

*The Total Fertility Rate which was 3.8 in 1980 has declined slowly to 3.5 in 1985 and 2.8 in 1994( See Page 4).*

*The incidence of Teenage pregnancies has been the focus of attention in the society throughout this past decade and in an effort to postpone child-bearing and/or reduce fertility among potential teenage mothers, this age-group has been the target of special programmes by the Population Policy Unit, the Ministry of Health, the Ministry of Education and also the Family Planning unit.*

*The percentage distribution of births by age of Mother occurring in 1993 and 1994 indicate that number of births to mothers aged 19 and under has fallen from 685 in 1993 to 625 in 1994, 2.1% of these births are to mothers 12-14 years in 1994 while 2.8% are for the same category of mothers in the previous year. At the same time, however, the proportion of births to women aged 20-24 years are hovering at 30.9% in 1993 and 30.1% in 1994. Births to women 25-29 are 24.2% in 1993 and 25.4% in 1994. Together these three age groups account for 74.4% and 73.1% of total births in 1993 and 1994 respectively.*

### BIRTH WEIGHTS

*8.3 % of births were below weight (2499 grammes and under) in 1994 as compared to 8.1 % in the previous year.*

*82.2% were average (between 2500 - 4000 grammes) in 1994 as compared to 81.5% in the previous year.*

*While 5.9% were over weight in 1994 (4001 grammes+) as compared to 5.5% in the previous year.*

*The not stated category amounted to 3.6% in 1994 as compared to 5.0% in the previous year.*

## DEATHS

### Total Deaths

Registered Deaths numbered 776 in 1994 a 14.4% decrease under the 1993 figure of 907. The crude death rate of 5.4 per 1000 population in 1994 is a decrease from the figure of 6.4.

### Infant Deaths

Number of infant deaths numbered 39 in 1994 a 33.9% decrease under the 59 infant deaths in 1993, causing the infant death rate to decrease to 10.9 a 35.9% decrease under the infant death rate of 17.0 in the previous year. This decrease was due to conditions of the prenatal period, primarily the nutritional condition of the mother. The decrease could also be as a result of the improved obstetric conditions resulting from the addition of the new wing at Victoria Hospital.

### Cause of Death

Of the Seventeen Cause of Death Categories listed the highest incidence of deaths in 1994 occurred under the heading Diseases of the Circulatory System numbering 282 or 36.3% of total deaths followed closely by Ill-defined Causes which numbered 108 or 13.9% as compared to 312 deaths or 34.4 % for Diseases of the Circulatory System in 1993 and 136 deaths or 15.0% for Ill-defined causes in 1993.

### By Month

There was no significant difference in the occurrence of deaths by month which ranges from a low of 55 in August to a high of 82 in January of 1994. As compared to a range of 65 in July and 84 in December 1993.

## MARRIAGES

### Previous Marital Status

A total of 466 marriages were registered in 1994, a 2.4% decrease under the 477 registrations in the previous year.

Of the 466 marriages which occurred in 1994 93.8% were between bachelors and spinsters as compared to 93.7% between the same group in the previous year.

### By Age

89.1% of the Marriages were to brides 44 years and under as compared to 91.6% in the previous year.

Whereas 84.9% of Grooms married below age 44 as compared to 83.9% in the previous year.

*Children born to Women at time of marriage*

*33.4% of Women getting married in 1994 had already borne children as compared to 30.9% in the previous year.*

*DIVORCES*

*Number of Divorces went down to 22 in 1994 as compared to 43 in the previous year.*

*Age*

*59.1% of Divorces occur to Males between the ages 40-49 in the year 1994 as compared to 39.5% in the previous year.*

*Whereas 45.5% of divorces occur to females between 40-49 in 1994 as compared to 32.6% in the previous year.*

PRINCIPAL VITAL STATISTICS RATES 1980 - 1994
